Optimal Settings

Maximum AI Visibility in 5 Minutes · v4.0 · March 2026

Which settings work best for which shop type — determined through tests with 450+ online shops across different CMS systems and industries.

Quick Start in 3 Steps

1 **Enter URL**
Enter your shop's homepage (e.g. https://www.myshop.com). Sub-pages are discovered automatically via the sitemap.

2 **Choose Preset**
Select "⭐ Recommended": automatically selects sale items, key categories and brands first.

3 **Generate & Upload**
Download the ZIP, upload llms.txt to your shop root. Done — AI assistants will find your shop.

Preset Selection by Shop Type

Preset	Best for	Selection	Rating
⭐ Recommended	All shop types	Sale items first, categories, brands, regular products	★★★★★
📦 Everything	Large shops (200+)	All URLs incl. system pages	★★★☆☆
🏷️ Categories only	Small shop / start	Category pages only, compact file	★★★☆☆
📋 Custom selection	Pro users	Manual + JSON export for cron jobs	Pro

CMS-Specific Tips

Gambio GX5
`Sitemap:` /public/sitemap-de_1.xml · Products end in .html
`Brands:` /hersteller/ automatically detected and crawled
`Rec.:` "Recommended" preset + enable Drill-Down

WooCommerce
`Sitemap:` via Yoast SEO or WordPress Core · Products: /product/
`Blog:` Affiliate categories correctly detected (not as products)
`Rec.:` "Recommended" preset + ensure Schema.org is active

Shopware 6
`Sitemap:` often gzip-compressed (.xml.gz) → decompressed automatically
`Tip:` Enter sitemap index URL directly
`Rec.:` Activate Schema.org plugin in theme

JTL-Shop	**Sitemap:** /sitemap.xml or /sitemap_index.xml
	Products: category path + item slug
	Rec.: JTL Schema plugin for better product data
